

Environmental Policy

Policy Objectives

This environmental policy document is intended to ensure that environmental concerns are considered when developing or improving business and operational practices throughout our company. This general policy covers environmental concerns specifically related to our business operations and defined in the West Australian Environmental Protection Act 1986.

Policy Aims

- To promote through all business activities a sound awareness of, and positive outlook towards the environment among all staff, clients and contractors.
- To reduce the adverse impacts of ATG's activities on local, national and global environments.

The Policy

- ATG recognises its environmental obligations to present and future generations both locally and globally.
- ATG accepts its responsibility for environmental protection.
- ATG aims to operate in a manner which minimises affects on the environment.
- ATG will monitor and be aware of its environmental legislative obligations when striving for the best practicable methods.
- ATG will endeavour to ensure that all employees are made aware of the company's environmental values and the types of behaviour which may be detrimental to those values.
- The environmental policy will establish a framework for setting and reviewing environmental goals in the form of an environmental management system.

Environmental Principles

To support ATG's environmental policy the following principles have been developed to provide additional direction on specific issues. ATG will address the major environmental concerns of environmental protection, waste management, recycling and energy conservation by employing the best practicable methods to;

- Conserve energy (produced by non-renewable resources and by methods which pollute the environment).
- Conserve water resources and minimise wastewater disposal.
- Minimise and, where possible, eliminate the use of harmful substances.
- Ensure the correct and safe disposal of all substances.
- Minimise waste generation through reduction, reuse and recycling.
- Make future planning decisions with this environmental policy in mind.
- Develop, maintain and audit an internal environmental management system.

This policy will be reviewed every 3 years.

Ben Doolan

Managing Director

Review Due 2018.

This policy applies to all ATG employees.
